

SOLOMON KOK NANLEEB

Computer Science and Engineering Student @ UMAT Ghana | AI/ML Engineer in Training | Es-snanleeb9424@st.umat.edu.gh | 0248009643 | [LinkedIn](#) | [GitHub](#) | [portfolio](#)

EDUCATION

BSc Computer Science & Engineering Tarkwa, Ghana

University of Mines & Technology (UMAT) Expected - October 2028

Relevant Courses: Web Development, Computer Graphics, Linear Algebra, Calculus, Database Systems, Discrete Maths, Differential Equations, Maths Analysis, Introduction to Java, Introduction to programming with Python, object oriented Programming, Computer Architecture & Organization, communication skills, Academic Writing & Advance Database System

Experience

- Completed Andrew Ng's **Machine Learning Specialization** (all 3 courses) from DeepLearning.AI on Coursera, gaining hands-on experience in supervised and unsupervised learning, neural networks, TensorFlow, decision trees, ensemble methods, clustering, anomaly detection, PCA, and recommender systems.
- Built and deployed an **SMS Spam Classifier** trained on 5,572 SMS messages, achieving **97.67% overall accuracy** and a **91.9% spam detection rate**. Addressed class imbalance using balanced class weights and deployed the application with Streamlit.
- Built a **Ghana COVID-19 Analysis Dashboard** analyzing pandemic data across 54 African countries and an interactive **Titanic Data Analysis Dashboard** using Python, Pandas, Matplotlib, and Seaborn.
- Currently co-founding **WasteAlert Ghana**, a technology platform designed to connect households with waste collectors and improve waste collection in Ghana. Exploring AI/ML applications including collector matching, arrival-time prediction, anomaly detection, and demand forecasting.
- Building practical **Machine Learning and NLP applications** using Python, Scikit-learn, TensorFlow, Pandas, NumPy, NLTK, Flask, and Streamlit, with a focus on turning concepts into deployable projects.
- Continuously documenting my **AI/ML learning journey, projects, and technical growth** through LinkedIn and GitHub while pursuing a Computer Science and Engineering degree at UMAT.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, & SQL

Libraries/ frameworks: NumPy, pandas, Scikit-learn, Matplotlib, TensorFlow

Tools: Git, GitHub, Jupyter Notebook, & MongoDB

PROJECTS

SMS Spam Classifier | Python, NLP, Scikit-learn, Streamlit | 2026

- Developed and deployed an NLP-based SMS spam classification model trained on **5,572 SMS messages**, achieving **97.67% accuracy** and a **91.9% spam detection rate**.
- Applied **TF-IDF vectorization, NLP preprocessing, and Logistic Regression** with balanced class weights to address class imbalance and improve classification performance.
- Deployed the trained model as an interactive **Streamlit web application**.

Live: <https://spam-classifier-solomon-kok-nanleeb.streamlit.app/>

Ghana COVID-19 Analysis Dashboard | Python, Pandas, NumPy, Streamlit | 2026

- Analyzed COVID-19 data across **54 African countries** to evaluate the pandemic's impact and response.
- Compared infection and mortality statistics, finding that **Ghana ranked 17th in total cases and recorded a 0.85% death rate** in the analyzed dataset.
- Built an interactive **Streamlit dashboard** for data exploration and visualization.

Live: <https://ghana-covid-19-dashboard-solomon-kok-nanleeb.streamlit.app/>

Titanic Data Analysis Dashboard | Python, Pandas, NumPy, Streamlit | 2026

- Performed exploratory data analysis on **891 Titanic passenger records** to identify patterns associated with passenger survival.
- Used **Pandas and NumPy** for data cleaning, analysis, and feature exploration.
- Developed an interactive **Streamlit dashboard** to present findings and visualizations.

Live: <https://titanic-data-analysis-dashboard-dkzepevrpzivukna24ibqd.streamlit.app/>

Hospital Management System | Python, SQL | 2026

- Developed a database-driven hospital management system for managing **patient records, appointments, and billing**.
- Implemented database integration and CRUD operations using **Python and SQL**.

Student Marketplace | HTML, CSS, JavaScript, PHP, SQL | 2025

- Developed an e-commerce platform for **UMAT students to buy and sell products** within the university community.
- Implemented user authentication, product management, database integration, and marketplace functionality.
